Servicenow

1. Basic Case (Customer Issue)

- **Scenario:**
- Customer says:
- “I can’t access my company email.”
- 🛠️ **Case:**
- Contact = Customer Name
- Account = Company
- Category = Access Issue
- Priority = High

- **Actions:**
- Assign to Support Team
- Send Email to customer
- change State to **Awaiting Info**

2. Case + Request Info

- **Scenario:**
- Customer reports:
- “My internet is slow”

- 🛠️ **Process:**
- Agent clicks **Request Info**

- **Result:**
- State → Awaiting Info
- Email sent:
- “Please provide speed test results”

3. Case + SLA

- **Scenario:**
- VIP Customer reports:
- “My system is down”
- 🛠️ **Configuration:**
- Priority = Critical

- **SLA:**
- Response SLA → 10 minutes
- Resolution SLA → 1 hour

- **Behavior:**
- If delayed:
  - Notifications triggered
  - Escalation to manager

4. Case + Flow Designer

- **Scenario:**
- Customer requests:
- “I need a laptop replacement”

Flow:

- **Trigger:**
- Case Created
- **Condition:**
- Category = Hardware Request
- **Actions:**
- Assign to Asset Team
- Check asset availability
- If available:
  - Reserve asset
- Else:
  - Create procurement request

5. Case + Knowledge

- **Scenario:**
- Customer asks:
- “How do I reset my password?”

- 🛠️ **Solution:**
- Agent searches Knowledge Base
- Sends Knowledge Article to customer

- **Result:**
- Faster resolution
- No need for escalation

6. Case + Event (Important)

- **Scenario:**
- Customer submits a case but is **not exist in the system** ❌

- 🛠️ **Process:**
- Create Contact automatically
- Generate login credentials
- Trigger Event
- Send email with credentials

7. Case + Notification

- **Scenario:**
- Case is created

- **Notification:**

Subject: Case Created

Your case has been received.

Case Number: ${number}

8. Case + Escalation

- **Scenario:**
- Customer has been waiting too long

- 🛠️ **Trigger:**
- SLA reaches 75%

- **Result:**
- Email sent to Manager
- Priority increased

9. Case + Parent / Child Cases

- **Scenario:**
- Multiple customers from the same company report the same issue

- 🛠️ **Solution:**
- Create Parent Case
- Automatically create Child Cases

10. Case + Email Integration

- **Scenario:**
- Customer sends complaint via email
- 🛠️ **Process:**
- Email automatically creates Case
