

Question 1: Correct

The following connector definitions are available out of the box for event management.  
Select 4 answer

- Solarwinds

(Correct)

- HP System Operations Manager
- Dynatrace
- IBM Netcool

(Correct)

- HP Operations Manager

(Correct)

- System Center Operations Manager

(Correct)

Question 2: Correct

How do you ensure the data integrity, completeness and correctness of your CMDB

- Using ServiceNow discovery as the only option
- Using correct identification and reconciliation rules

(Correct)

- Always using Scripts to manage CMDB
- Manually deleting duplicate CIs

Question 3: Incorrect

The following information is used for binding CI to an event . Select 2 answers

- Additional information

(Correct)

- Node

(Correct)

- Source

(Incorrect)

- Message key

Question 4: Incorrect

What type of configuration is used to classify primary and secondary alerts

- transform rules
- alert rules

(Incorrect)

- correlation rules

(Correct)

- event rules

Question 5: Incorrect

How do you resolve latency issues with processing of events

- verify if the bucket field in the event table is set to a value  $> 0$

(Correct)

- **Set this property value `evt_mgmt.event_processor_enable_multi_node>2`**

(Incorrect)

- Create multiple copy of the scheduled jobs

Question 6: Incorrect

Which alert is needs to be actioned first based on the below setting:

| Alert No | Priority | Severity |
|----------|----------|----------|
| ALT00032 | 5000     | Major    |
| ALT00045 | 400      | Critical |
| ALT00055 | 400      | Major    |

- ALT00045

(Incorrect)

- ALT00055

- ALT00032

(Correct)

Question 7: Correct

When do alerts get auto closed in the alerts table? after

- 28 days
- 14 days
- 7 days

(Correct)

### Explanation

a property

Question 8: Correct

Where in ServiceNow application are the events recorded?

- The system transactions log
- Em\_event table

(Correct)

- System log

Question 9: Incorrect

Which configuration is required to transform source system values into Event values, for eg: severity in one system is "x", but should be "Critical"

- event field mapping

(Correct)

- transform maps
- transform and compose alert configuration

(Incorrect)

- alert field mapping

Question 10: Correct

What is the default setting for scheduling when a new Connector Instance is Setup

- 15 seconds
- 60 seconds

- 120 seconds

(Correct)

- 10 seconds

Question 11: Incorrect

What options are available when using the "Quick response" ui action on a Alert

- Launch Application

(Correct)

- Run remediation

(Correct)

- Launch Workflows
- Create Incident

(Incorrect)

Question 12: Correct

What is the purpose of AMB( Asynchronous Message Bus) in ServiceNow

- Monitors the ecc queue for data to be sent to the Mid Server
- Monitors the ecc queue for creating CIs in the CMDB
- Establishes an inbound connection into the midserver

(Correct)

Question 13: Incorrect

The anomaly thresholds are between 17.23445 and 28.208989, for which of the below thresholds is an anomaly alert generated, select 3 answer

- 17.23445
- 28.999

(Correct)

- 28.208989
- 35.999

(Correct)

- 40

(Correct)

Question 14: Incorrect

Everything of the below can be seen on the Event Management Dashboard except

- Correlation groups

(Correct)

- Alert group
- Business service
- Technical service

(Incorrect)

- Discovered Business service

Question 15: Correct

If a company needs a performance monitoring tool which of the following statements are true for ServiceNow

- Yes, ServiceNow can be used
- No, ServiceNow cannot be used for this

(Correct)

Question 16: Correct

What class is looked up by default for event binding to a CI

- cmdb\_ci\_server
- cmdb\_ci\_node
- cmdb\_ci\_hardware

(Correct)

- cmdb\_ci

Question 17: Incorrect

How often are events fetched from the monitoring systems by default

- 30 seconds
- 15 seconds

(Incorrect)

- 5 seconds

(Correct)

Question 18: Incorrect

What is used to avoid de duplication of alerts for the same event

- Type
- Sysid

(Incorrect)

- Message key

(Correct)

- Source

Question 19: Correct

The following application is required on the midserver to be capture statistical models based on metric data

- Discovery
- ServiceAnalytics

(Correct)

- Operational Intelligence
- ServiceMapping

Question 20: Correct

Where in the event rule do you define to ignore events from converting to alerts

- event binding
- transform and compose alert output
- event filter

(Correct)

- event options

Question 21: Incorrect

What role can be allocated to a user to allow creating business service and technical services

- Evt\_mgmt\_admin

(Correct)

- Evt\_mgmt\_operator
- Evt\_mgmt\_integration

(Incorrect)

- Evt\_mgmt\_user

Question 22: Incorrect

What are the 3 important factors measured on the CMDB View Health Dashboard

- Compliance

(Correct)

- Correlation
- Conciseness
- Completeness

(Correct)

- Correctness

(Correct)

Question 23: Incorrect

Which configuration needs to be done to map event fields to alert fields

- event mapping rules
- transform maps

(Incorrect)

- alert management rules

(Correct)

- imports

Question 24: Correct

Which type of code is used in event rules

- python
- regex

(Correct)

- javascript

- av/code

Question 25: Incorrect

\_\_\_\_\_ is the process of uniquely identifying CIs to determine if a CI Already exists in the CMDB or if it is a newly discovered CI that needs to be added to the CMDB

- Identification

(Correct)

- discovery

(Incorrect)

- transform map
- reconciliation

Question 26: Correct

The following capabilities are required to enable Operational intelligence for a Mid Server

- Cloud Management
- Operational Intelligence Metrics
- Mid Web Server

(Correct)

- SNMP Trap Listener

Question 27: Incorrect

What is the default flap frequency threshold for event management

- 20
- 5

(Incorrect)

- 30
- 10

(Correct)

Question 28: Incorrect

The below address is used to make REST API Call to create events in ServiceNow

-

1. `https://xyz.service-now.com/api/now/table/em_event`

(Correct)

- 1. `https://xyz.service-now.com/now/table/em_events`
- 1. `https://xyz.service-now.com/table/now/api/em_event`

(Incorrect)

- 1. `https://xyz.service-now.com/v2/now/table/api/em_event`

Question 29: Incorrect

In the absence of messagekey from the source system for events, what fields can be used to derive uniqueness

- source, node, class, metric name
- source, node, type, metric name

(Incorrect)

- source, node, type, resource, metric name

(Correct)

Question 30: Correct

How do you automatically promote an anomaly alert to a normal alert

- event rules
- anomaly alert promotion rules

(Correct)

- alert management rules

Question 1: Skipped

How is a secondary alert identified

- using cmdb relationship

(Correct)

- using event mapping rules
- using alert management rules

- using event rules

Question 2: Skipped

Which alerts are classified as Urgent priority group:

- Alert whose severity is critical
- Alert whose priority score is more than 1000
- Alerts with priority score above the value defined in `evt_mgmt.top_priority_group_threshold` property

(Correct)

Question 3: Skipped

Where can the default CI Binding for an event rule be changed

- Event Management properties
- Event rule binding section

(Correct)

- Event Options
- Event Rule Transform and Compose section

Question 4: Skipped

What is the function of the ECC Queue

- Push information to the mid server for processing
- Store probes/messages to be processed by the mid server

(Correct)

- Create CIs to be stored in the CMDB

Question 5: Skipped

How can you achieve binding an application on a host to an alert in event management.

- Business Rules
- Workflow
- metadata rules

(Correct)

- CI Identifiers (Choose the criterion attributes to match event attributes)

(Correct)

#### Question 6: Skipped

Where can you link alerts to supporting knowledge articles

- knowledge base
- event mapping rules
- event rules
- alert management rules

(Correct)

#### Question 7: Skipped

How do you change default Alert Priority Score Calculations

- modifying values in the em\_alert\_priority tables(em\_alert\_priority\_category\_order, em\_alert\_priority\_category\_mapping etc)

(Correct)

- Using priority lookup definitions
- Alert management rules
- Using the alert management rules

#### Question 8: Skipped

How do you resolve latency issues with processing of events

- Use of the event\_processor\_job\_count property
- Use of event\_processor\_enable\_multi\_node property
- Use of bucket field value on the event

(Correct)

#### Question 9: Skipped

What is the script that allows you to populate incident fields from an Alert

- EvtMgmtCustomIncidentPopulator\_SNOW
- EvtMgmtCustomIncidentPopulator\_SNC
- EvtMgmtCustomIncidentFieldPopulator
- EvtMgmtCustomIncidentPopulator

(Correct)

#### Question 10: Skipped

Which of the following state is not part of an event lifecycle

- ready

- in progress

(Correct)

- error
- processed
- ignored

Question 11: Skipped

Operational Intelligence uses \_\_\_\_\_ to build statistical models based on metric data

- Service Analytics

(Correct)

- Event rules
- Discovery
- Service Mapping

Question 12: Skipped

What is the default CI binding rule for event management

- Binding to a Device

(Correct)

- Binding to an application on a Host

Question 13: Skipped

What is the default action on Alerts when associated incidents are resolved

- Alerts are closed automatically

(Correct)

- No action is taken on Alerts

Question 14: Skipped

What happens when more than one matching alert management rule is found for event

- All Alert management rules are executed in the order of execution (from the lowest to the highest)

(Correct)

- All Alert management rules are executed in the order of execution (from the highest to the lowest)
- The first matching alert management rule is executed and stops processing

Question 15: Skipped

Where do you specify manual attributes in an Event rule

- Transform and compose Alert

(Correct)

- Event filter
- Binding
- event options

Question 16: Skipped

In Event Management, what module allows for automatic task creation?

- Event Rules
- Alert Action Rules

(Correct)

- Task Rules
- Correlation Rules

Question 17: Skipped

Remediation Workflows are triggered from :

- Alert management rules

(Correct)

- event management rules
- event rules
- business rules

Question 18: Skipped

The below Connector Definitions are available in the OOTB Event management. please select 4 answers

- SCOM

(Correct)

- IBM Netcool

(Correct)

- IBM Tivoli
- HP Operations Manager

(Correct)

- Zabbix

(Correct)

Question 19: Skipped

If a metric source registration record is marked as inactive, is the source allowed to send metric data

- no

(Correct)

- yes

Question 20: Skipped

\_\_\_\_\_ converts event attributes into Alert fields

- transform maps
- alert management rules
- event rules

(Correct)

Question 21: Skipped

\_\_\_\_\_ parses event source values into appropriate ServiceNow event attributes

- event field mapping

(Correct)

- alert management rules
- event rules

Question 22: Skipped

Please choose the correct format for the REST Endpoint for PUSH of Operational Intelligence Metrics

- http[https]://midserverip[fqdn]/api/mid/sa/metrics

(Correct)

- `http[https]://midserverip[fqdn]/api/table/sa/metrics`
- `http[https]://midserverip[fqdn]/api/mid/sa/em_metrics`

Question 23: Skipped

To troubleshoot transactions and events that occur in your instance, look in the

---

- system log module

(Correct)

- transaction logs
- `em_events` table

Question 24: Skipped

Default CI Type attached to an Alert

- `cmdb_ci_node`
- `cmdb_ci_hardware`

(Correct)

- `cmdb_ci`

Question 25: Skipped

The impact of Alerts is calculated with the following factors

- Event Rules
- Impact Rules

(Correct)

- Service Configuration Table

(Correct)

- Severity of Events

Question 26: Skipped

How many events are processed in one batch of the scheduled job execution by default

- 1000
- 500

(Correct)

- 100

Question 27: Skipped

The \_\_\_\_\_ determines whether an existing event need to be associated to an existed alert or a new alert needs to be inserted

- source
- node
- resource
- message key

(Correct)

Question 28: Skipped

In Operational Intelligence, what module allows for automatic Alert creation from an Anomaly Alert?

- Event Rules
- Alert Promotion Rules

(Correct)

- Alert Action Rules
- Task Rules

Question 29: Skipped

MID in Mid Server stands for

- Management , Install and Discovery
- Management , Instrumentation and Discovery

(Correct)

- Metrics, Instrumentation and Discovery

Question 30: Skipped

All of the below can be seen on the Event Management Dashboard except

- Discovered Business service
- Correlation groups

(Correct)

- Technical service

- Alert group
- Business service
