

What is virtual Agent? How can Install virtual Agent How can we use virtual Agent?

Virtual Agent

Virtual Agent is a conversational platform that helps users obtain information, make decisions, and perform common work tasks within a messaging interface.

This includes information stored in the **Knowledge Base**, **Service Catalog**, and **more!**

Through live agent support, users have the option to **switch to a human agent** for assistance at any time, ensuring they receive the help they need.

Virtual Agent Examples

IT Service Management

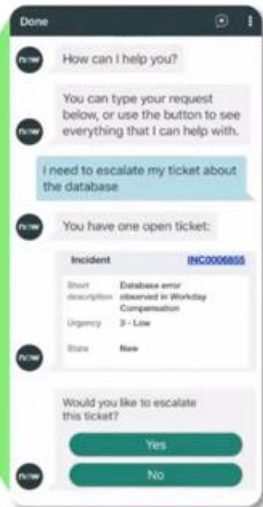

"I need to reset my password."
"How do I order a new monitor?"
"Do we have any outages right now?"
"I need help with my laptop."
"How can my guest connect to the Wi-Fi?"

HR Service Delivery

"I need to add a new emergency contact."
"I have a problem with my paycheck."
"How do I request a leave of absence?"

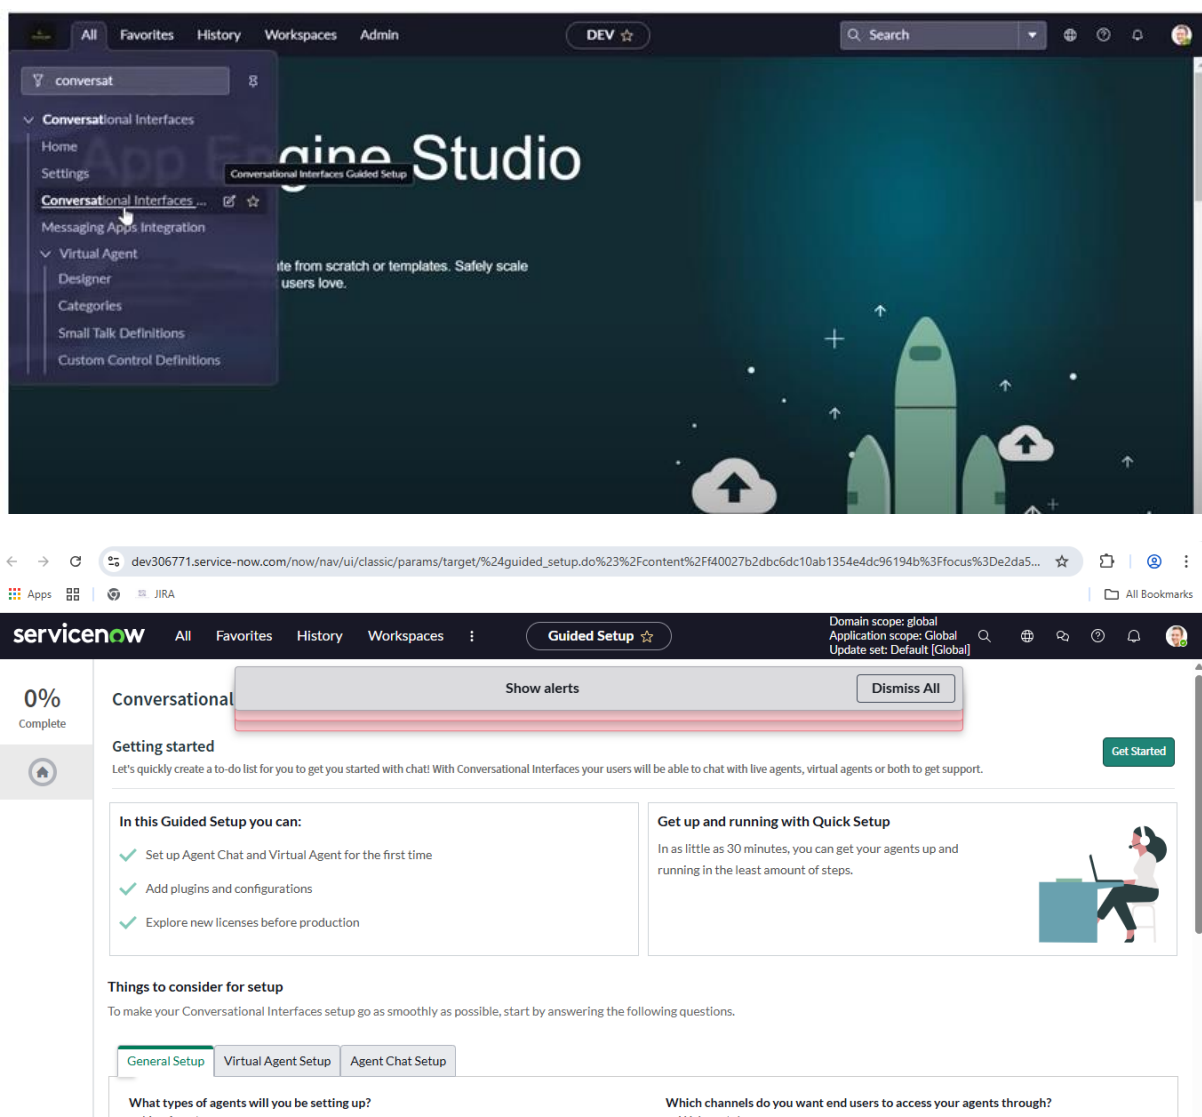

Customer Service Management

"I have a problem with my last order."
"What is the status of my case?"

Benefits of Virtual Agent

- Increased Customer Satisfaction
- Provides quick solution
- 24/7 Support
- Reducing workload from the Agent

See additional licenses to explore for upgrade (optional)

To explore new licenses, add new agents below into a non-production environment

- ☐ Virtual Agent for Customer Service Management (CSM)
- ☐ Virtual Agent for Field Service Management (FSM)
- ☐ Virtual Agent for HR Service Delivery (HR)
- ☐ Virtual Agent for IT Business Management (ITBM)
- ☒ Virtual Agent for IT Service Management (ITSM)

Then, decide how you want to set up the licenses. Manual Setup

☐ Quick setup

This lets you preview the basic Agent experience(s) in the minimum number of required steps. It will take approximately less than 30 minutes to complete.

☒ Manual setup

This is a comprehensive list of steps to fully set up your Agent(s). Some steps are optional, depending on your configurations & preferences. It will take approximately a couple of hours to days.

Continue

Now first we need to do Plugins and store applications

Plugins and store applications

You must have the System Administrator (admin) role to complete these tasks.

Let's activate the specific plugins and store applications for the features you want to set up.

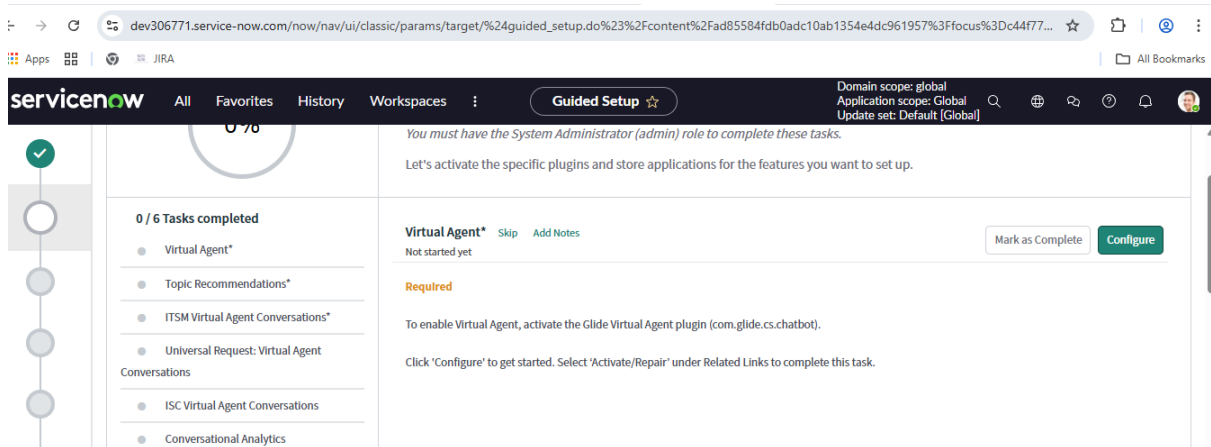

0 / 6 Tasks completed
5 Tasks skipped

- Virtual Agent*
- Topic Recommendations*
- ITSM Virtual Agent Conversations*

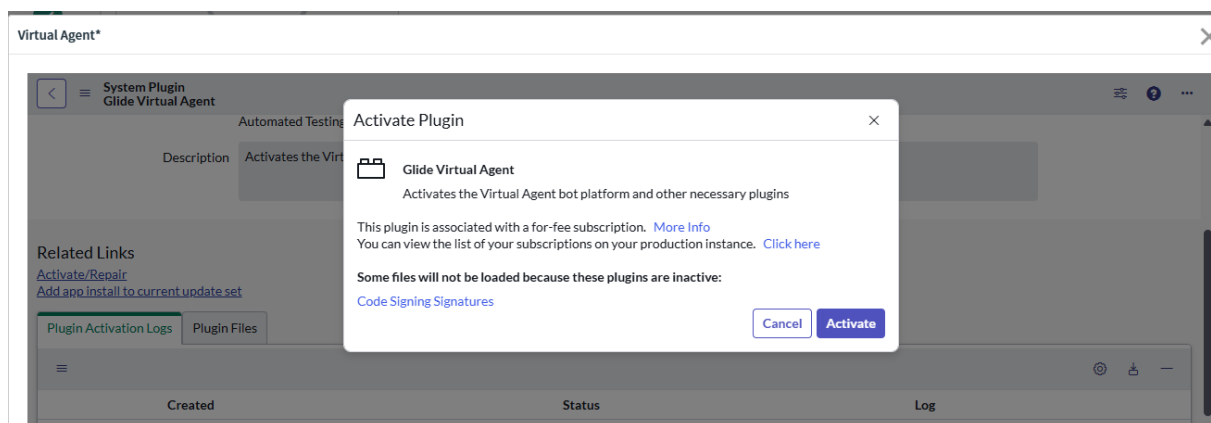

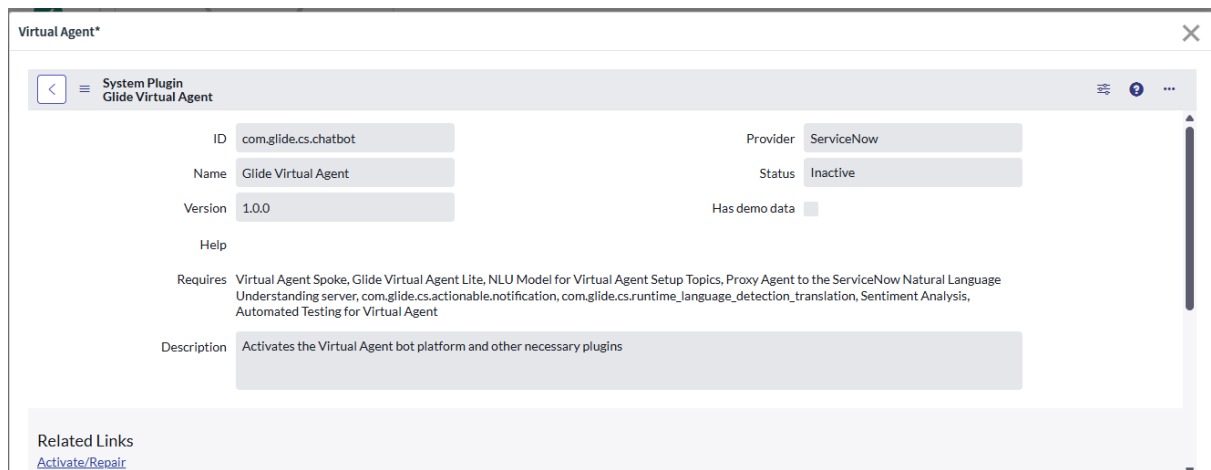

We need to complete these plugin area task click on get started

To enable Virtual Agent, activate the Glide Virtual Agent plugin (com.glide.cs.chatbot).

Now start configure

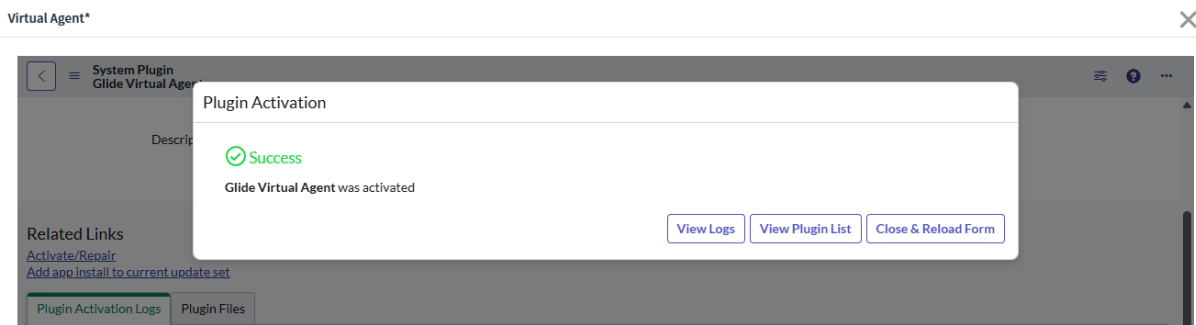

You can see this is inactive you need to click option active /Repair

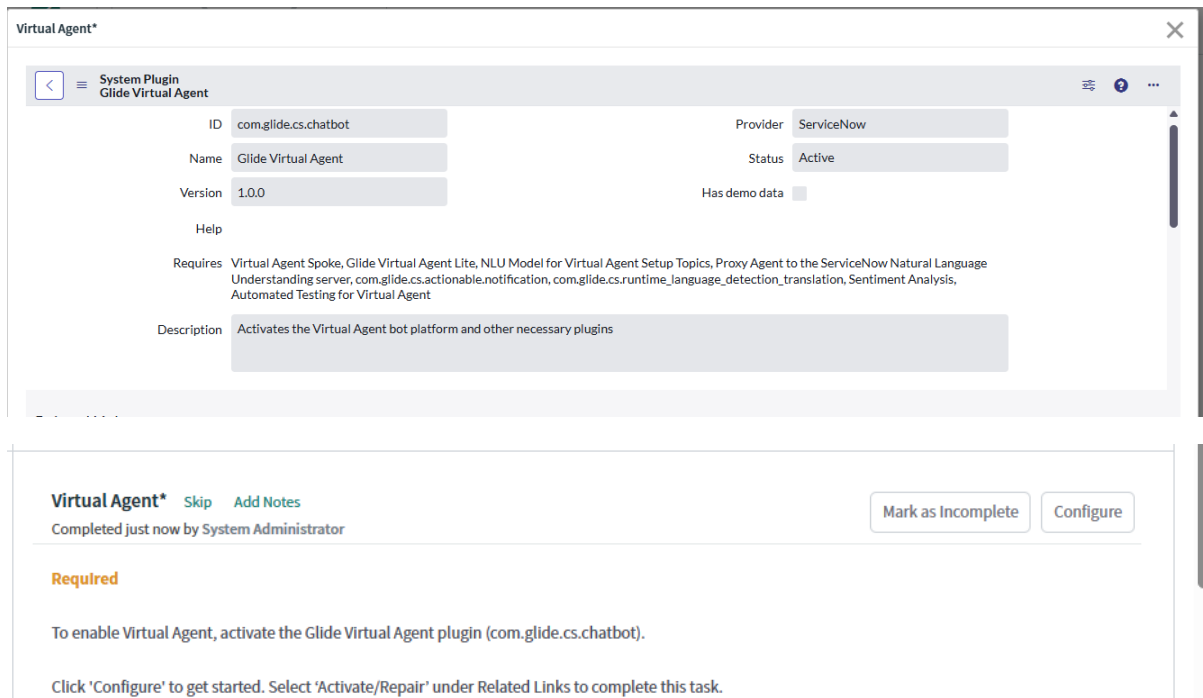

Click on activate tab

It will take 10/ 15 min for activate you will receive success popup

We can close and reload form and this time it showing active and now we can click on mark as complete

Now next is Topic Recommendations* not much needed to install now move on next ITSM Virtual Agent Conversations* now we need to configure this same way now click on configure

ITSM Virtual Agent Conversations*[Skip](#)[Add Notes](#)

Last visited 22m ago by System Administrator

[Mark as Complete](#)[Configure](#)

Required

To enable pre-built Virtual Agent conversations for IT Service Management, activate the ITSM Virtual Agent Conversations store application.

Click 'Configure' to get started. From the store application page, select 'View Products' and 'Opt-in' to complete this task.

Search Apps, Solutions, Offerings and more...

[Sign In](#)

Now you can see open ServiceNow store here we wont be able to store you can store something if you have licence but we have dev instance we don't need to purchase anything I will close this and just copy **ITSM Virtual Agent Conversations** I will show you another way of installing

Now go navigation section and type plugins and open it

Here you can see all plugins and paste ITSM Virtual Agent Conversations and search it

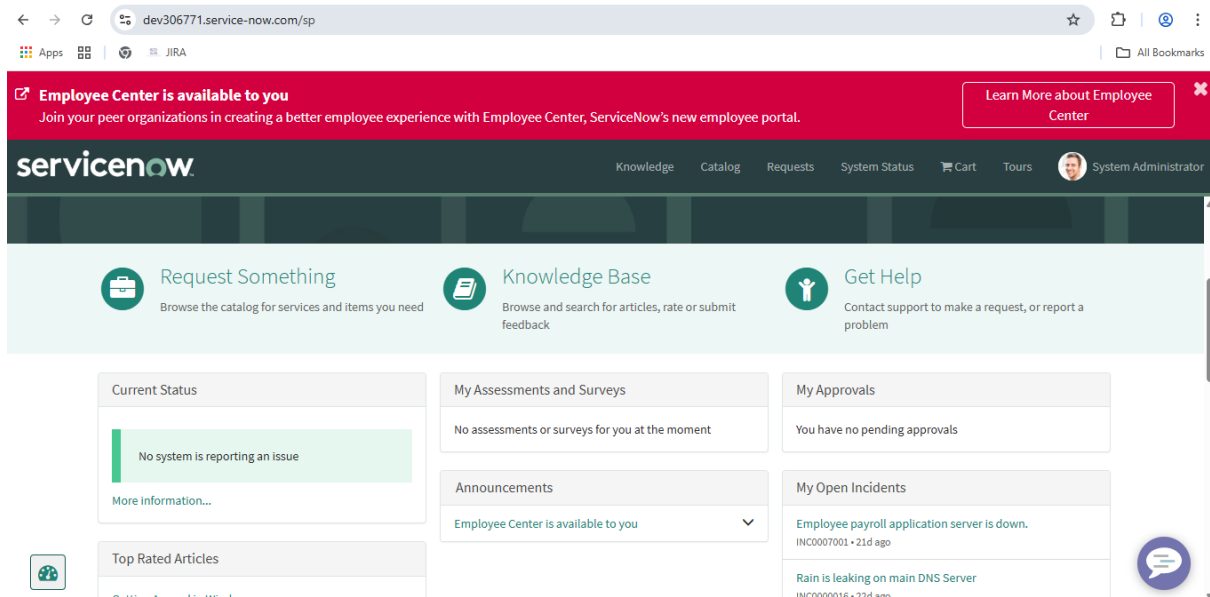

Now you can install now mark as complete and we are about to complete 33% other plugins which you can install now we can see how its working

. you need to open ServiceNow portal

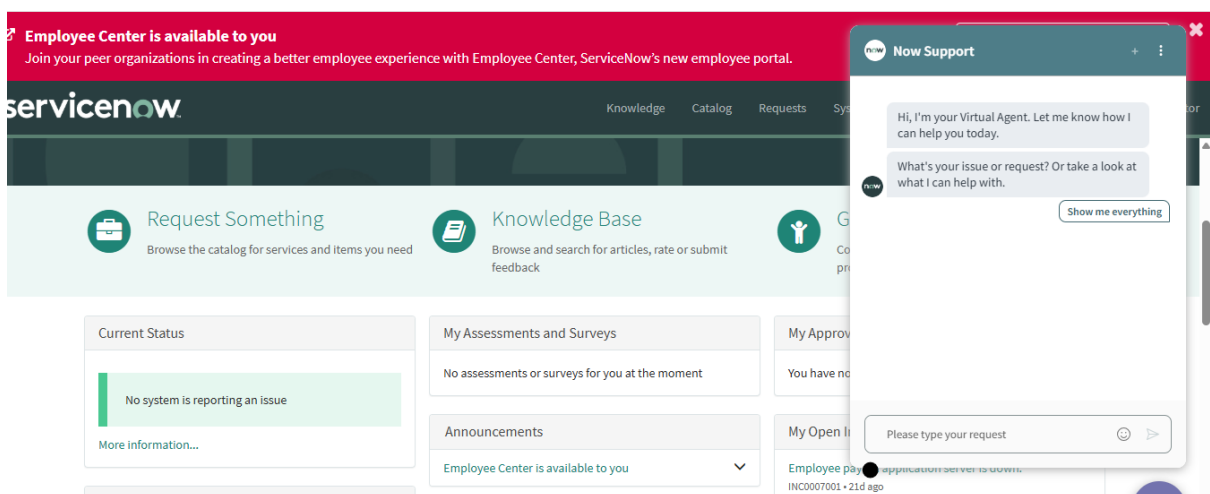

By using <https://dev306771.service-now.com/sp>

Now you can see

This is chat window where we can activate the virtual Agent so now we have activate plugin so now we can click on it and show how its look like actually the basic structure

You can see

This is the virtual agent.
