

UI Policy real time scenario

1.Created a ui policy to hide field Case ,Order Guide and Configuration Item on RITM.

UI Policy
Hide Following Fields: Case, Order Guide and Configuration Item View: Advanced

UI policies change fields on a form based on a set of conditions. Use UI policies to show or hide fields, or to make fields mandatory or read-only based on these conditions. A UI policy specifies one or more actions to take when the policy is triggered. First, create the policy. Then add as many actions as necessary. UI policy actions are applied only if all of the following conditions are met:

- The UI Policy is Active
- The Items in the Conditions field evaluate to true
- The field specified in the UI policy action is present on the specified form

More info

Table: Requested Item [sc_req_item] Application: Global

Active: ☒

Short description: Hide Following Fields: Case, Order Guide and Configuration Item

When to Apply: Script

Conditions: Add Filter Condition Add "OR" Clause

Item.Category.Parent is Facilities Operations

now in Ui Action select the field name you want to hide

UI Policy Actions (3) UI Policy Related List Actions Wizard UI Policy Actions Catalog UI Policy Actions Versions (12)
